

Gurtam Factsheet

International IT-company

Founded in 2002, Gurtam is a global leader in fleet management and IoT software development. Wialon, its flagship product, is a multifunctional fleet management system for tracking mobile and stationary assets. For 16 years, Wialon has entered the national markets of more than 130 countries with 1,900,000+ units being tracked worldwide.

Gurtam has over 1,000 partners

They have from dozens to hundreds of clients each. These partners are both small enterprises and big corporate groups. For instance, big-name brands such as Coca-Cola, Lukoil, Mobil 1 use our solutions.

Comprehensive tools for vehicle tracking

Gurtam partners integrate Wialon with the equipment offering their clients a complex solution. When applied, it looks like this: a tracker installed in a vehicle picks up a satellite signal and sends the data to Gurtam server; we process this information and provide it in the form of analytical reports.

Offices

The company is headquartered in Minsk (Belarus) with sales offices in Moscow (Russia), Boston (USA), Dubai (UAE) and Buenos Aires (Argentina).

Our Products

SaaS version of GPS tracking system Wialon. Offers a broad range of functions and flexible settings. All product updates come up in real time.

A server version of Wialon system that is controlled by the client himself.

PaaS solution created specifically for a handy work with devices and telematics data integration into software. It is aimed at transferring telematics data to the programs controlling automation.
