# Wialon GPS tracking solutions

Wialon Hosting is a SaaS solution featuring advanced functionality and flexible configuration. The cloud version is hosted in Wialon Data Center that ensures 99,9% system stability and allows to instantly launch the service on your website herewith eliminating the costs associated with server acquisition.

Wialon Local is a flexible turnkey solution installed on your server. The delivery mode promotes data security, and modular structure allows you to choose only the features relevant to your business.

Wialon mobile app for iOS and Android offers a handy interface and smart system capabilities for you to continue real-time fleet management from anywhere globally.

WiaTag is a native tracker application that works seamlessly with Wialon to become a perfect choice for mobile workforce management and personal tracking.

OUR SOLUTION

# Fleet management

Control driver behavior

Optimize expenses

Increase fleet productivity

Wialon for fleets is an innovative web-based fleet management platform available in SaaS and server-based delivery modes. The system lets you focus on the KPIs of particular importance thereby maximizing the efficiency of your business.

Reduce labor, fuel, and depreciation costs by decreasing idle time, optimizing miles driven, and managing driver behavior. Plus, get to more jobs faster and get more done.

## FEATURES

Flexible report-building tools

Mobile app for iOS and Android

Precise GPS/LBS location detection

Temperature control in trucks

Maintenance scheduling and control

Route optimization tools

OUR SOLUTION

# Asset tracking

Analyze and visualize KPIs with Dashboard

Track sensors in real time with Sensolator

Employ LBS positioning for improved tracking

Effective asset tracking often gives businesses an advantage that propels them past competition. Wialon provides dynamic data on the location and condition of assets concerned.

Control every aspect from temperature to airflow, make use of standard or event-based video monitoring, embrace flexibility and extensive support for third-party tracking devices and accessories. Choose Wialon for your asset tracking needs.

## FEATURES

Access control for containers and facilities

Trigger-based alarms and notifications

Numerous sensors support

Various RFID-enabled solutions

Detailed landmark history of asset movements and sensor values

OUR SOLUTION

# Fuel

consumption  
control

Control the full cycle of fuel distribution

Prevent any type of fuel fraud and misuse

Manage fuel consumption in the mobile app

Fuel is typically one of the largest fleet expenses. Finding ways to minimize fuel spent can substantially improve the bottom line.

Wialon fuel monitoring system provides intelligent tools to keep track of fuel consumption and easily detect fuel thefts. Fuel information can be sourced from the CAN bus of a vehicle or after-market fuel sensors and counters. Take charge of your fuel use with Wialon.

## FEATURES

Powerful report-building tools

Intelligent fuel consumption management

Flexible configuration to create custom calculation system

Map markers for fuel thefts and fillings

Instant notifications on fuel level variations

OUR SOLUTION

# NimBus

[gurtam.com](http://gurtam.com)

Create  
or import  
stops

Add rounds,  
schedules, and  
bind units

Plan rides  
and control  
them in real-time

Nimbus is a new solution for fleet managers designed to control the movements of vehicles on route. It comprises the core functionality of satellite tracking system and specialized tools designed for public transportation tracking.

Use NimBus to add and import stops, optimize routes and distribute vehicles between them, manage schedules and track route performance in real time, thus creating the business-specific solution to address any issue in the area of passenger transportation.

## FEATURES

User-friendly interface

Event-based notifications

Intuitive navigation

Handy timeline for online tracking

Multi-level access rights system

API for third-party systems integrations

OUR SOLUTION

# Logistics

[gurtam.com](http://gurtam.com)

Create orders with detailed description

Plan and optimize routes

Coordinate delivery process

The advantageous order management service by Gurtam is designed to control all stages of delivery and field services operations. The solution simplifies transportation arrangements, optimizes transport processes, and ensures cost-saving operations. Logistics service comprises a web version for dispatchers and a mobile app for drivers.

#### WEB VERSION
