

Gurtam Factsheet

International IT-company

Founded in 2002, Gurtam is an international software developer that specializes in the development of GPS tracking solutions. These solutions help businesses to make maximum use of their fleets. There are more than 1 300 000 million vehicles worldwide that are tracked by our fleet management system.

Gurtam has over 1,000 partners

They have from dozens to hundreds of their own clients each. They are both small enterprises and big corporate groups. For instance, big-name brands such as Coca-Cola, Lukoil, Mobil 1 use our solutions.

Comprehensive tools for vehicle tracking

Our partners integrate Gurtam software with the equipment offering their clients a complex solution. When applied, it looks like this: a tracker installed in a vehicle picks up a satellite signal and sends the data to Gurtam server; we process this information and provide it in the form of analytical reports.

Our offices

There are offices in Moscow, Boston, Dubai and Buenos Aires. Gurtam headquarters is located in Minsk.

Our Products

SaaS version of GPS/GLONASS tracking system Wialon. Offers a broad range of functions and flexible settings. All product updates come up in real time.

A server version of Wialon system that is controlled by the client himself.

PaaS solution created specifically for a handy work with devices and telematics data integration into software. It is aimed at transferring telematics data to the programs controlling automation.
