

Employee transportation in Siberia

Problem

SIBUR Tobolsk, a huge petrochemical plant, faced a problem of transporting employees to the workplaces. Many of its several thousand workers were out-of-towners who did not know the city well when they arrived. The plant needed the tool for the centralized transportation of employees to their workplaces. Thus, making working conditions comfortable for everyone.

Solution

Wialon partner, PK SKT company, suggested using NimBus application for passenger transportation management for this project.

- Specialists built up 300 routes in **NimBus**, set up schedules and stops, and trained dispatchers to edit and reassign routes and rides if necessary.
- **QR code**, provided by the company, links to Locator with the bus location on the map in real-time.

Implemented products

NimBus, Wialon

Result

At the end of the six-month trial period, the client received:

- **Staff transportation** by buses to or from work right on schedule;
- **Real-time** monitoring of buses;
- **The decrease** in the number of late arrivals;
- **Discipline improvement;**
- **Optimized schedules** for corporate transport;
- **Creating and maintaining** a positive image of the company which cares about its employees.
